1969 News from the Whitehorse Star

Wolf Dog Attacks Four Year Old

A four year old girl is in serious condition following an attack by a "wolf dog" at Watson Lake on Saturday. Patricia Anne Glowa, daughter of Mr. and Mrs. Alex Glowa of Watson Lake was flown to Whitehorse General hospital suffering from severe bites to the right groin and multiple other injuries. She has undergone surgery and was flown to Edmonton yesterday for further treatment.

The attack occurred at 12:30 p.m. Saturday by a wolf which is kept at Watson Lake for breeding purposes. Details of the incident were not immediately known.

The child was put aboard C.P. Air's northbound jet which brought her into Whitehorse in the record time of 25 minutes.

Employment Opportunity

Bookkeeper

Under the general direction of the Director of Finance & Administration, this position is responsible for handling accounting practices, maintenance of fiscal records, and the preparation of financial reports including LSCFN's payroll and general monthly bank reconciliations. Answer routine enquiries, taking messages and other related duties as requested. Criminal Record Check, Term, full-time (1 year)

Utilities Manager

Reporting to the Capital Director, the Utilities Manager is responsible for the operation, monitoring and maintenance of water, sewage, mechanical, and electrical systems owned by the LSCFN and provides technical support to the Department of Capital Works in environmental related projects, and performs other related duties. High school graduation followed by several years' post-secondary education in water distribution, waste water collection and treatment systems. Certification in the operation of water distribution, water treatment and waste water treatment systems. Training and/or experience in staff supervision and general management. Permanent full-time.

Whitehorse Office Administrator

Reporting to the Executive Director, the Whitehorse Office Administrator is responsible for providing secretarial and administrative services in support of the LSCFN Government at the Whitehorse office. Organizing and scheduling meetings and other Committees as requested. Researching, compiling and prepare briefings on current issues identified by LSCFN Citizens residing within the Whitehorse area. Permanent full-time.

Heritage Assistant

Reporting to the Heritage Manager, the Heritage Assistant is responsible for assisting the Heritage Manager in establishing and maintaining the heritage section of the Land and Resource department. The position will research, archive and establish displays of heritage sites and artifacts of the LSCFN, work in partnership with LSCFN members and members of the Northern Tutchone Tribal Council to gather, verify and document the LSCFN heritage information, and perform other related duties. Term full-time, 6 months with a possibility of extension.

Lands and Resource Director

Reporting to the Executive Director, the incumbent is responsible for the overall planning, implementing and management of the Little Salmon Carmacks First Nation Lands & Resources Department. The position is responsible for implementing LSCFN rights and obligations related to land and resources within the Traditional Territory as directed through the Land Claims agreement. This is carried out by ensuring administration of all laws, regulations and policies related to use and occupation of Settlement Lands of the LSCFN; assisting the LSCFN Government in issues related to lands and resources; ensuring proper regulation and within the LSCFN Traditional Territory; and other related duties. Permanent full-time.

Implementation Assistant

Under the general direction of the Implementation Manager/Negotiator, this position is responsible for general administrative duties in the Implementation department. This position is required to research information on specific projects as directed by the supervisor attending meetings/negotiations as required; fill in when Implementation Manager is away; travel as required to attend various tables; other duties as required by Implementation Manager/Negotiator. Permanent full-time.

LSCFN hire policy will apply.

If you are interested, please submit your expression of interest along with your resume by 4:30 P.M. April 24, 2017 to:

Doris Johnson, Human Resource Officer
 PO Box 135, Carmacks Y.T. Y0B 1C0
 Phone: (867)863-5576 ext 280
 Fax: (867)863-5710

2017 Mosquito Control Program

Larval surveying and monitoring is scheduled to begin as early as 17 April 2017, depending on conditions. The goal of the annual control program is to reduce adult mosquito annoyance for residents and visitors. Experience has proven that the best way to achieve this is through effective control of larval mosquito populations.

Control of larval mosquito populations will be completed as required, and where necessary, throughout the season on the basis of mosquito population surveillance. Larvicide applications will be made using aerial (helicopter) and ground-based, hand-broadcast methods. Control program operations will extend throughout the summer and until mid-August.

Larval development occurs with water accumulations from snowmelt and precipitation in depressions and established ponds. Permanent water bodies include stagnant ponds, marshes, non-flowing ditches, depressions and any other natural or man-made container, which can hold water for several weeks or months. Left unchecked mosquito larvae will complete their development to adult and provide a source of annoyance. For this reason control program efforts are focused on the identification and treatment of developing mosquito larvae using the biological larvicide VectoBac 200G which contains the heat-killed bacterium, *Bacillus thuringiensis* var. *isrealensis* (Bti). This bacterium is specific in its control of mosquitoes and biting flies. It does not reproduce in the environment and has no effect on non-target insects, fish, birds or mammals, including humans, livestock and pets. All applications will be directed to infested mosquito development habitat located within, and adjacent to, the City of Whitehorse.

Residents can reduce the likelihood of mosquito bites by eliminating mosquito development sources around their property and by using personal protection methods. Regular draining and refilling of wading pools, livestock watering troughs, tires, bird baths and emptying of tarped boats, canoes or wheelbarrows reduces a source of potential mosquito development. Filling of depressions such as tire ruts, borrow pits and excavations prevents water accumulations and the creation of larval mosquito habitat.

While the larval mosquito control program will reduce overall mosquito populations, residents and visitors should still be prepared to protect themselves from adult mosquitoes. Ensure window screens are in good condition, wear loose, light coloured clothing. Limit outdoor activities near landscaped areas, marshes, ponds, lake margins and forested or overgrown areas where adult mosquitos may rest. Avoid perfumed skin care products, shampoos and consider using repellents.

The firm responsible for managing control program operations is Duka Environmental Services Ltd., an environmental services firm with over 25 years of providing these specialized services to the Yukon. All mosquito larvicide applications would be completed under the approved conditions of Pesticide Use/Service Permit #21-004. For more information on mosquitos, the control program or VectoBac 200G please visit www.duka.consulting or www.valentbiosciences.com. You can also leave a message for the mosquito control program biologist at City of Whitehorse offices, locally through the 'BITE' line 633-BITE (2483), or directly with Duka Ltd. at 1-604-881-4565 or at 1-800-681-3472. Biologists will follow up with a telephone call and on-site property inspection where required.
