1962 News from the Whitehorse Star

Liquor Tackled

Much publicity has been given lately in speeches, addresses, open letters and finally in Council to the Alcohol and related Health & Welfare problems. We have learned from the Chief Medical Health Officer that a snow-balling lion's share of welfare expenditures, as well as Public Health and Indian Health Services costs are the direct consequence of uncontrolled Alcoholism.

The Commissioner emphasized in his opening address to Council the urgent need for action to ensure better control of the situation but differed widely as to the priority and timing of such action. The entire issue may be tabled for some time and nothing done now despite the build-up over the last year.

If the claims of the Public Health and Welfare offices are true, and anyone with open eyes does not need to study the statistical evidence to know the truth of it, then council must ask itself: What other business can be more important than to tackle this over-riding problem - Alcoholism and its destructive effects?

In an interview with Dr. O. Schaefer, who, with his relentless campaign since fall of 1960 in public and private

talks, articles and interviews, has propagated a growing awareness of the interrelated problems of Alcoholism, social degradation, diseases and delinquency, we asked him to outline again a practical Alcohol control system, which he first proposed last year in a talk given to the Alcoholics Anonymous Association.

TOP HOSPITAL RATE

Dr. Schaefer shared his remarks with a citation from a 1959 publication according to which Alcoholism, with well over 200,000 victims in Canada, is the nation's 4th greatest health problem, outranked only by mental diseases, cardiovascular diseases and cancer. He pointed out: "In the Yukon Territory, however, Alcoholism is by far the greatest health problem, outranking every one of the other three. This reflects on the higher hospitalization rate of the Yukon Territory - the highest in Canada - the more remarkable as normally with out young population structure, we should have one of the lowest rates in Canada."
