Employment Opportunity

Providing leadership through our strengths in programming, services and research, Yukon College's main campus in Whitehorse and 12 community campuses cover the territory. A small college, YC provides a stimulating and collegial environment. We work with Yukon communities, Yukon First Nations, local governments, business and industry, to promote a community of learners within a vibrant organization. Come join us as we continue to enhance the Yukon's capacity through education and training.

Research Assistant – HRV Data Analysis

Yukon Research Centre

Ayamdigut (Whitehorse) Campus

Term Position from September 2014 to June 2015

Hours: Maximum of 560 hours

Competition #: 14.97

Initial Review Date: August 26, 2014

Are you looking to support your post or undergraduate program?

As part of a collaborative project with Canadian High Arctic Research Station, Canadian Mortgage and Housing Corporation, Yukon Housing and the Municipality of Cambridge Bay, Yukon Research Centre are collecting data via the internet from six Heat Recovery Ventilators located in Cambridge Bay, NU with a view to doing detailed data analysis and making recommendations for how best to design HRVs for operating in northern climates. The Research Assistant will work as part of the project team setting up analysis and reporting protocols, analyzing the data through software programs such as Tableau, and in conjunction with YRC and Yukon Housing, produce monthly and quarterly reports on HRV performance and a final summary report on how the HRVs performed over the course of an arctic winter. The final report will also include recommendations for improving the HRV design to better operate in the north. This is an ideal opportunity for an individual looking for a real time project to support on-going studies.

Duties:

- Analyzing raw data in a software program
- By looking at specific parameters such as power consumption, time in defrost, energy efficiency etc. determine how individual HRV's are performing
- Preparing monthly and quarterly reports on HRV performance based on statistical analysis
- Attending regular meetings with Yukon Housing and YRC to discuss analysis techniques and findings
- Writing a final report detailing analysis over a 10 month period and to include recommendations for refining HRV design for suitability in the north.

Qualifications:

- Background in environmental science or engineering will be considered an asset
- Proven organizational skills, attention to details, and ability to work independently
- Excellent interpersonal and communication skills
- Familiarity with Microsoft Excel, Word, and Power Point
- Familiarity with similar software will be considered an asset

1962 News from the Whitehorse Star

BURIED IN TRENCH

Two men were buried in a trench yesterday afternoon at the vocational school site when an earth and gravel wall collapsed on them. Most seriously injured was Ronald Burnett of Whitehorse who received a broken leg and a broken pelvis. Vernon Ekland received also a broken pelvis. When the wall came down, the two men were working close together in the trench being dug to accommodate sewer and water pipes. They were completely covered by the slide but, fortunately, Bennett and White Superintendent Nelson Ford knew their exact location and, when the rescue effort began, he could pinpoint their location and dug them out. The trench at the point of collapse was approximately 14 feet deep. About the first five feet were frozen ground but beneath that the gravel was loose. Both city fire departments rushed to the scene and also workmen from other parts of the city were called to assist. It was Ekland's second trip to the hospital in three weeks. He was just released after a broken ankle healed.

The Whitehorse Star, Thursday, April 12, 1962
