Truth is an essential part of any successful ad campaign. Smart advertisers have known this for years. That's why the advertising industry created the *Canadian Code of Advertising Standards* more than 40 years ago. Since then the *Code* has set the standards for acceptable advertising in Canada. It helps ensure that the ads you see and hear are truthful, fair and accurate. Check it out for yourself. Because the more you know about advertising, the more you get out of it.

Winterizing Your Pet

When the temperature (and the snow) begins to fall, you'll find that your pet needs a little extra care from you. Here are some points to remember this winter.

Cats and dogs need protection from wet and cold, whether they get it inside your house or inside their own. Cats are best kept inside when it gets cold, as are most small and short-haired dogs. An outdoor dog needs a dry, elevated dog house with clean, dry bedding and a flap over the opening to keep drafts out. Or consider adding a dog door to the garage with a soft cushion in the warmest corner.

A bowl of frozen water can't help a thirsty pet. Check outdoor water bowls often when it's below freezing, and break the ice or refill with water as necessary.

Outdoor dogs need more calories in the winter to produce body heat, so increase the amount you feed your pet. On the other hand, indoor dogs and cats may get less exercise in the cold months, and will need fewer calories to avoid weight gain.

Chemicals used to melt snow on sidewalks can irritate pets' paws, so you may need to wipe them with a wet cloth after an outing. Dogs outside in the snow may need the ice between their pads removed.

Antifreeze tastes good to pets, but it is a deadly poison. The most likely source of the poison is radiator drainage spots in your garage, which should be flushed with water immediately.

A cat may crawl up under your car seeking shelter and warmth near the engine. It may get caught in the fan and seriously injured when the engine starts. Open the hood of your car or slap it noisily with your hand before starting the engine on cold days to startle any animal sleeping there.

One Quick Turn...

and it's over for this dog!

You're not doing your dog any favours letting her ride in the back of a pick-up truck. Besides risking eye injury from wind blown debris, dogs are easily jolted out of open pick-ups and often suffer crippling injuries or death.

Use a protective kennel secured to the truck bed or let your best friend ride safely in the cab.

A message from your local S.P.C.A./Humane Society

1901 News from the Whitehorse Star

Five New Boats

To Be Built By The W.P. & Y. Route

150 To 200 Ship Carpenters Will Be Employed In The Work

Mr. G.C. Mellott is authority for the statement that the management of the W.P. & Y. Route have purchased five steamers from the Canadian Pacific, used formerly on the Stickene river by the C.P.R., and that they will be brought to Skagway and taken down for shipment to White Horse where they will be rebuilt with a view to the needs of river navigation. Hotline & Co., of Seattle, have the contract for the construction of the new boats and will have from 150 to 200 ship carpenters here inside of a month to commence active operations. The boats purchased by the W.P. & Y. Route are the Ogilvie, Hamlin and McConnell, which are now at Wrangel, the Dawson, now on the ways at Vancouver, which, though completed has never been launched and the Walsh, which has been lying in the Fraser river since the failure of the route up the stickene river to the Yukon. The purchase of these boats give the W.P. & Y. Route absolute control of fifteen first class river steamers, and will practically place the whole of next season's trans-

portation business to the interior in its hands.

Captain Sanborn will superintend the construction and see that they are put up in accordance with contract. The contract calls for their completion by 1st of June next.

A new freight tariff sheet will also be issued in a short time, which will do away with the present system of charges by weight and measurement, and in lieu thereof all freight will be classified and rated according to the grade and quality of the goods.

Among contemplated improvements for the rapid handling of freight a large derrick will be erected on the wharf at White Horse for loading and unloading machinery and other heavy material.

If it becomes necessary another addition to the immense warehouse will also be built, and as soon as the ground thaws sufficiently to allow work to be commenced an electric light plant will be installed for the purpose of lighting the depot, wharf and warehouses.

The White Horse Star, February 6, 1901
