Whitehorse Star 02/22/62

Start Flats Move

Removal of buildings from squatter areas in Whitehorse is to commence at once. Northern affairs and territorial officials made the announcement today.

The first step will be moving all buildings not being used for residential purposes. Areas involved include Crown land on Whiskey Flats, Moccasin Flats, Sleepy Hollow, West of Eighth Avenue and on the Two Mile.

The government will move these buildings without charge at the request of the owners to privately owned or leased land anywhere within a 10- miles radius of the city.

The free move applies only to buildings which meet the standards of the area to which they are to be moved.

Detailed information concerning the proposed move is available at Room 306 in the federal building.

The government spokesmen said residential buildings will be moved at a later

date.

Initial announcement of the program for clearing these areas was made prior to the Lot 19 plebiscite. At that time the government indicated it intended to remove buildings from the various squatter areas where Crown land was involved.

Territorial subdivisions to which buildings may now be moved, if they meet the standards, include Crestview at Mile 923 and Canyon Crescent at Mile 912. Seventy-five new lots will be available at Porter Creek upon completion of the plan of survey which is expected to be finished very soon.

A transient area, where land may be leased, is being cleared now North of the Two Mile Hill. Minimum standards will apply there, commensurate with health and sanitation requirements. It is expected to be open in early summer, dependent upon securing a good water supply.

The New Gold Strike

The first authentic news to be received from the new strike on Livingstone creek in the Big Salmon country is that brought out by Mr. Leonard Matchett who, though not the discoverer, was one of the first locators on the creek. The discoverers were some former employees of Mr. J.C. Tache, who went into the country last summer and, having found good prospects on a tributary of Livingstone creek, took up claims and started to work to reach bedrock, but the ground was frozen so hard and they encountered so much water that they were unable to accomplish much.

Mr. Matchett is a practical miner of over 20 years experience, and last summer worked on the War Eagle mine in White Horse district. Of the new strike, he says: "The discovery was made by the LaRose brothers and others, and is six miles below Livingstone. It is seven miles from the gulch to the summit and 15 miles from there to the Hootalinqua. It is the finest glacial wash I ever saw, and I have been engaged in mining for the past 20 years.

"When I left there were 22 claims recorded and as I met quite a number going in on my outward trip, I suppose by this time there are a great many more.

"I washed out some of the dirt on one of the dumps and as a result secured 5 cwt of gold. The gulch is full of large boulders and it is going to take considerable capital and a good deal of hard work to get down to bedrock, but I am fully convinced from what I have seen that the ground will warrant the outlay.

"After I had staked my claim I went down the river about 100 miles to record, but when I reached the post the recorder was absent. I think some effort should be made by the

people of White Horse to have the recorder's office for that district located here, as it is the proper and most convenient place to have it.

"The much talked of winter trail from White Horse to the Big Salmon should be built at once. It will save half the distance between the two places and is a very easy way to get in. As near as I can estimate, the distance by the cut-off to Livingstone is 80 miles, while by the way of Hootalinqua it is about 160 miles. The worst part of the shorter route is the first four miles out from La Barge, and consists of a few steep bluffs, which, however, can be easily surmounted by building sidehill grades. The rest of the way is plain sailing until the Hootalinqua is reached, when another grade will have to be made to reach the river. From there on to the mines a good trail has already been built.

"The trade from the Big Salmon country during the coming season is going to be large, and the business men of White Horse ought to get in and work to secure it. On my way out I met a party of 35 men going in under contract to work for Mr. O'Brien of Dawson, and I understand that he intends to increase this force to 80 as soon as he can get things in shape. There are at present about 250 men in the district and in all probability there will be a great many more in a short time. I heard it reported that one company intends to spend \$50,000 in development work during the coming summer.

"At present supplies of all kinds are very high. Flour is \$28 per 100 pounds; bacon 38¢ per pound; ham 50¢; tobacco \$2 and rubber boots \$16 per pair, and very poor boots at that."
