Wear Your Seat Belt at All Times!

To all C/TFN Citizens & Beneficiaries,
the Government of Carcross/Tagish First Nation is offering you residential lease parcels in the Watsix Eetí (Carcross Cutoff, C-82B) subdivision. There are 38 lots of approx. 1ha size. The application deadline is April 30, 2019.

Please contact Doris Dreyer at (867) 333-6631 or denzena@yahoo.ca for more information. She can assist you with questions about the lease application process, how to obtain a mortgage, the permits required and what can be built.

If you have not received an application package by mail, please submit a request to reception@ctfn.ca.

**2019 Mosquito Control Program**

Larval surveying and monitoring is scheduled to begin as early as April 16, 2019, depending on weather conditions. The goal of the annual control program is to reduce adult mosquito annoyance for residents and visitors. Experience from past programs has proven that the best way to achieve this is through effective control of larval mosquito populations.

Control of larval mosquito populations will be completed as required, and where necessary, throughout the season on the basis of mosquito population surveillance. Larvicide applications will be made using aerial (helicopter) and ground-based, hand-broadcast methods. Control program operations will extend throughout the summer and until mid-August.

Larval development occurs with water accumulations from snowmelt and precipitation in depressions and established ponds. Permanent water bodies include stagnant ponds, marshes, non-flowing ditches, depressions and any other natural or man-made containers, which can hold water for several weeks or months. Left unchecked, mosquito larvae will complete their development to adult and be of annoyance. For this reason, control program efforts are focused on the identification and treatment of developing mosquito larvae using the biological larvicide VectoBac 200G which contains the heat-killed bacterium, *Bacillus thuringiensis var. israelensis* (Bti). This bacterium is specific in its control of mosquitoes and biting flies. It does not reproduce in the environment and has no effect on non-target insects, fish, birds or mammals, including humans, livestock and pets. All applications will be directed to infested mosquito development habitat located within, and adjacent to the City of Whitehorse.

Residents can reduce the likelihood of mosquito bites by eliminating mosquito development sources around their property and by using personal protection methods. Regular draining and refilling of wading pools, livestock watering troughs, tires, bird baths and emptying of tarped boats, canoes or wheelbarrows reduce sources of potential mosquito development. Filling of depressions such as tire ruts, borrow pits and excavations prevents water accumulations and the creation of larval mosquito habitat.

While the larval mosquito control program will reduce overall mosquito populations, residents and visitors should still be prepared to protect themselves from adult mosquitoes. Ensure window screens are in good condition, and wear loose, light coloured clothing. Be aware of outdoor activities near landscaped areas, marshes, ponds, lake margins and forested or overgrown areas where adult mosquitos may rest; as well as using perfumed skin care products, shampoos and consider using repellents.

The firm responsible for managing control program operations is *Duka Environmental Services Ltd.*, an environmental services firm with over 25 years of providing these specialized services to the Yukon. All mosquito larvicide applications would be completed under the approved conditions of Pesticide Use/Service Permit #21-004. For more information on mosquitos, the control program or VectoBac 200G please visit www.duka.consulting or www.valentbiosciences.com. You can also leave a message for the mosquito control program biologist at City of Whitehorse offices, locally through the 'BITE' line 633-BITE (2483), or directly with Duka Ltd. at 1-604-881-4565 or at 1-800-681-3472. Biologists will follow up with a telephone call and on-site property inspection where required.

Notice of Proposed Rezoning

Carcross Development Area Regulation

Please be advised that the Government of Yukon is proposing the following zoning amendment by Order-in-Council for the Carcross Development Area:

"Excessive Noise" in relation to the Watson River Residential (WR-1) zone, s.32.2.1(d) is further defined as including:

1. Any dog-related noise associated with a dog kennel within the Watson River Subdivision, on any part of a property, that can be heard on another property, at any time, day or night, and is continuous, sporadic, or erratic for any period of time in excess of ten consecutive minutes.
2. For the purposes of this section, the term "dog kennel" means a structure which provides shelter for three (3) or more dogs for personal use, or a commercial establishment providing dogs with shelter on a short- or long-term basis.

The purpose of the proposed zoning amendment is to better define and address excessive noise related to dogs in the Watson River Subdivision. If an excessive noise complaint is received, the Development Officer will take steps to determine whether the noise is considered excessive and may carry out actions to bring a property into compliance.

Written comments will be received until May 10, 2019 at the Land Planning Branch K320LP, Department of Energy Mines and Resources, Box 2703, Whitehorse, Yukon, Y1A 2C6, by fax 867-393-6340, or by email to larissa.lychenko@gov.yk.ca.

For more information on this proposed amendment, please visit emr.gov.yk.ca/landplanning. Click on Current Applications or contact the Land Planning Branch at (867) 667-3734 or toll-free at 1-800-661-0408 ext. 3734.
