Whitehorse Fire Damage. Six men salvaging what they can from the ashes of the May 23, 1905 fire.

WHITEHORSE SWEEP BY FIRE

Whitehorse was swept by fire early this morning and is now a mass of blackened smoking ruins. Loss \$300,000.

The single fire engine at a critical moment gave out, and quickly the best part of the city became involved in ruin.

The fire takes the city, extending from the post office to the telegraph office and crossing the tracks, sweeping the railroad, the White Pass depot, three of the best hotels and dozens of the smaller buildings.

Construction of the three big hydro plants in the vicinity of Kluane Chilkoot Pass and Teslin. Estimated out - 500,000,000 horsepower - makes this the largest integrated power yield in the world.

In conjunction with the hydro construction, plans call for erection of smelters and leaching plants to process ores from Frobisher holdings in the Yukon, Northwest Territories, Ontario, Quebec, Greece and southern Rhodesia. Frobisher also has properties under development in Uganda, West Africa, Venezuela, Peru, Labrador, Montana, North and South Dakota.

Details of the plan - official permission for preliminary surveys has already been given - came to light recently and followed by a month rejection of a United States bid to harness the Yukon River system, of which Lac Laberge is a part.

At that time Resource Minister Winters intimated that development of Canadian resources in the area should be left to Canadian enterprise - Frobisher is owned by the gigantic Canadian industrial empire, Ventures Corporation.

A GRIM DEATH INDEED

Of all the accidents that can befall a person on a boat surely an explosion and fire is one of the worst. Three tons of black powder exploded on the Columbian's forward deck that fateful September day and the resulting fireball was carried the length of the ship by a downstream wind. Everyone in the immediate vicinity of the explosion would die, except for passenger Ernest Winstanley. He would be saved by his long underwear.

The Purser, Lionel Cowper had been burned over his entire body. As was the medical custom at the time of the accident, he had been wrapped in an oily blanket and given strychnine pills. In Whitehorse, when it became obvious that he was going to die, massive amounts of "opiates" were administered, but relief lasted only minutes.

Hamacher photo/Muirhead coll./Yukon Archives.
WRECKAGE of the COLUMBIAN - The charred hull, which was a menace to navigation, was floated downstream a short way and abandoned in "Columbia" slough.

Horses Need Winter Care Too!

Usually, horses can withstand a lot of cold, but they are not invincible. Making sure your horse gets the winter care he deserves can insure a healthy, happy horse all year round.

FIRST, make sure your horse gets annual vaccinations for rhinopneumonitis, Eastern and Western encephalomyelitis and tetanus. Get him checked for worms in the fall since he will have more energy if he is not playing host to a load of worms.

NEXT, be sure to have his teeth checked before winter so he can chew his food properly. This is a time he will need to burn more energy to stay warm, therefore increase his ration of hay.

ALSO, one of the most important things to check is that your horse has a clean, dry but well ventilated place to stay. A damp environment can lead to colds, coughs and viral infections. Poor ventilation can cause respiratory diseases while your horse can develop pneumonia if the stable is too hot or too tight. If you don't have a barn, your horse should at least have a three sided shelter, open on the down-wind side. Moist bedding can cause foot infection, so keep it dry.

BESIDES THIS, snow might be deep. Shoes should be pulled, because snow could ball up badly in shod hooves. This makes it difficult for your horse to walk. Trim the hooves enough so they won't crack or break, but not too short. As your horse paws through the snow, he will wear them down, causing sore hooves.

REMEMBER, if exercising your horse in cold weather, give him more time to warm up his muscles so he will be limber. And don't forget to break the ice in his water bucket or trough.

1920 - Lieut. Crumrine's airplane from "The Alaska Flying Exp." His chronic tire problems were fixed by Whitehorse resident Bert Peterson of the White Pass.

FIRST AIRCRAFT

Whitehorse Paved the Way for Aviation in the North.
For a history of aviation in the Yukon Territory we have to go back to June, 1920, when Capt. H.T. Douglas of the U.S. Air Force and Capt. H.A. Leroyer of the Canadian Air Board arrived in Whitehorse to talk over a proposed international aeroplane flight from Mineola, N.Y. to Nome Alaska. They both came with the authority of their respective governments to make all necessary arrangements for landing places, fuel, supplies, etc. In commenting on the proposed flight the Whitehorse STAR of that day described it as "an event that will go down in history as one of the most daring conceptions of the potentialities of aerial flight that has ever been conceived since the possibilities of a lighter-than-air craft as a means of transportation became, through the inventive genius of man, a certainty."
