TORNADO HITS WATSON LAKE

What has been described as being a phenomena in this part of Canada occurred on Wednesday, September 9 between two and 3:00 p.m. when a tornado formed over Watson lake, raced down the far shore opposite the airport and up the bank to dissipate somewhere in the bush by the tank farm. The tornado was accompanied by a short but extremely heavy hail storm with some of the stones measuring three-quarters of an inch in diameter. Pete Koszuk, the only known eye-witness to the forming of the tornado said the water began to swirl and gradually lift off the surface. Evidence of its violence can be seen on the path it took when it struck the lake shore. Poplar, jack pine and spruce trees varying in height 30 to 70 feet and four to 10 inches in diameter were uprooted and piled together like matches. Fortunately the tornado struck only the lake and the trees.

**Employment
opportunity**

Through our Whitehorse campus and 12 community campuses across the territory, Yukon University (YukonU) partners with the 14 Yukon First Nations in all that we do. Building relationships with, and responding to Yukon First Nations needs, through programming and research is at the core of our institution. YukonU is a hybrid institution, offering degree, diploma and certificate programming across a multitude of disciplines, including trades and university prep coursework. Research is a significant component of YukonU as well; we've achieved top spot for the number of paid student researchers, as compared to similar-sized institutions. Join us as we continue to build the North. Together we thrive!

City Resident Makes Polar History

Whitehorse resident Martyn Williams has become the first Canadian to reach both poles of the earth using only skis and a small dog team.

Williams, 44 and his three companions on the International north Pole Expedition were picked up Saturday after six grueling weeks of fighting severe temperatures, driving winds, and tough, unpredictable sea ice.

All four members of the group are South Pole veterans. Australian Mike McDowell 44, accompanied Williams to the South Pole in 1990. Norwegian brothers Sjur, 27, and Simen Modre, 29, traveled to the South Pole in 1991.

Many people have reached both poles without mechanized assistance. Until now, only Briton Robert Swan traveled from South to North.

The group is now resting at the advance base on Ellesmere Island before they return tonight to Resolute Bay, N.W.T.

Tough terrain slowed progress for the first few weeks. However, the expedition traveled more than 25 kilometers a day in the last couple of weeks to make up for last time.

They had to reach the pole by May 12. After that date, warming temperatures cause fog and broken ice, which makes air pick-up impossible.

"But part of it was because they just really wanted to get out ...

Made it! Yukoner Martyn Williams, right, completed the international North Pole Expedition is six weeks along with Mike McDowell and brothers Sju and Simen Modre, at left.

Soak up a little Yukon history.

The Whitehorse Star web site has more to offer than daily news, classifieds and editorials. You'll find news stories of the past (1900 up to 2000) taken from the archives of the Whitehorse Star. Be informed of the Past and the Present... Check it out!!

Life expectancy of average outdoor cat: 2-3 years
Life expectancy of average indoor cat: 15 years

Indoor spayed and neutered cats lead long, happy and healthy lives. Cats that have experienced the outdoors will need time to adapt to inside life but will soon enjoy the comforts of a safe indoor home.

A message from your local S.P.C.A./Humane Society
