THE 'DISCOVERY WELL'

Little was it thought when the original "Discovery Well" was drilled in 1928 in the Fort Norman area that, through the exigencies of war, the oil that flowed from there would be piped to Whitehorse, a distance of 595 miles, and refined here. The transportation of men and equipment over a road more than a thousand miles long was one of the major obstacles encountered and overcome. Camps, warehouses and platforms were constructed and pre-fabricated, barges, tugs assembled and Camp Canol was established.

In June 1942 the U.S. Engineer troops arrived in Waterways, a small frontier town northeast of Edmonton, and the men of the navigation system in Norman Wells on the Mackenzie River. By the summer of 1943 the water system had been well established, in the meantime another route from Dawson Creek, B.C. to Whitehorse on the Alaska Highway had been opened. This pioneer road was completed in November 1942 and converted into an all-weather military highway by October 1943.

As the transportation systems came into operation crews started from Whitehorse and Norman Wells to construct the Canol access road at both ends. This road was completed in December 31, 1943 and in the following February (1944) the first weld was made in the 595-mile pipeline. On April 30, 1944 the official opening of the refinery was fittingly commemorated.

Friday, March 2, 1945.

Horses Need Winter Care Too!

Usually, horses can withstand a lot of cold, but they are not invincible. Making sure your horse gets the winter care he deserves can insure a healthy, happy horse all year round.

FIRST, make sure your horse gets annual vaccinations for rhinopneumonitis, Eastern and Western encephalomyelitis and tetanus. Get him checked for worms in the fall since he will have more energy if he is not playing host to a load of worms.

NEXT, be sure to have his teeth checked before winter so he can chew his food properly. This is a time he will need to burn more energy to stay warm, therefore increase his ration of hay.

ALSO, one of the most important things to check is that your horse has a clean, dry but well ventilated place to stay. A damp environment can lead to colds, coughs and viral infections. Poor ventilation can cause respiratory diseases while your horse can develop pneumonia if the stable is too hot or too tight. If you don't have a barn, your horse should at least have a three sided shelter, open on the down-wind side. Moist bedding can cause foot infection, so keep it dry.

BESIDES THIS, snow might be deep. Shoes should be pulled, because snow could ball up badly in shod hooves. This makes it difficult for your horse to walk. Trim the hooves enough so they won't crack or break, but not too short. As your horse paws through the snow, he will wear them down, causing sore hooves.

REMEMBER, if exercising your horse in cold weather, give him more time to warm up his muscles so he will be limber. And don't forget to break the ice in his water bucket or trough.

Carcross News

Alfred Dickson has bought a new Chevrolet Light Truck and is now busy freighting over the ice from Carcross to his ranch at Tagish. Mr. Dickson predicts that there will soon be a through auto road from Carcross to Atlin. Chief Lauderdale and Fireman McCaulay arrived in the north on the last Princess and are already busy getting the Tutshi in readiness for the season's operations.

J.A. Begg returned from the outside on Saturday last and is already back at his post in the WhitePass station.
